PISCES

Feb 19 - 20 March

Zodiac Facts

The final Sign of the Zodiac is said to encompass elements of all the Signs that came before, and is symbolic of the time in the womb before being born, the gestation period. They are deeply mystical and connected to the ethers, have big dreams and are in touch with their emotions and intuition. People born under Pisces are boundary-less and formless, able to seamlessly adapt to those around them, often absorbing others' energy unknowingly.
